THE
BOSTON MEDICAL AND SURGICAL JOURNAL.

VOL. XXXIX. WEDNESDAY, DECEMBER 31, 1898. No. 20.

PASSAGE OF AN IRON ROD THROUGH THE HEAD.

To the Editor of the Boston Medical and Surgical Journal.

DEAR SIR,—Having been interested in the reading of the case of "Injury of the Head," reported in your Journal by Professor Shipman, of Catskill, N. Y., I am pleased to offer you the case of a very severe, singular, and as far as the result is taken into account, almost unparalleled case, of that class of injuries, which has recently fallen under my own eye. The accident happened in this town, upon the line of the Rutland and Washington Rail Road, on the 11th of Sept. last, at 4½ o'clock, P. M. The subject of it is Patient P. Gage, a foreman, engaged in building the road, 25 years of age, of middle stature, vigorous physical organization, temperate habits, and possessed of considerable energy of character.

It appears from his own account, and that of the by-standers, that

FOR JULY 1859.

ART. I.—*Dr. Harlow's Case of Recovery from the passage of an Iron Rod through the Head.* By HENRY J. BURLING, M. D., Professor of Surgery in Harvard University. (With a plate.)

This following case, perhaps unparalleled in the annals of surgery, and of which some interesting details have already been published, occurred in the practice of Dr. J. M. Harlow, of Cavendish, Vermont. Having received a verbal account of the accident, a few days after its occurrence, from a medical gentleman who had examined the patient, I then became incidentally inter-

RECOVERY AFTER SEVERE INJURY TO
THE HEAD.

MR. PRESIDENT AND FELLOWS OF THE
MASSACHUSETTS MEDICAL SOCIETY:

I have the pleasure of being able to present to you, to-day, the history and sequel of a case of severe injury of the head, followed by recovery, which, so far as I know, remains without a parallel in the annals of surgery. The case occurred nearly twenty years ago, in an obscure country town (Cavendish, Vt.), was attended and reported by an obscure country physician, and was received by the Metropolitan Doctors with several grains of caution, inasmuch that many utterly refused to believe that the man had risen, until they
